

The Best Audio Performance And Most Complete Feature Set To Date From A SIRIUS Satellite Home Tuner

The SR-H1000 Tuner features audio component size and styling to match standard premium audio components and is loaded with convenience and performance features. With the addition of an optional Home Connect Tuner SC-H1, the SR-H1000 becomes a two audio stream/zone tuner capable of receiving different SIRIUS Satellite radio programs at one time. Custom Integrators will appreciate the ease and low cost of adding an additional audio stream to multi-room audio systems. The SR-H1000 is bound to be a sports fan favorite with its Instant Replay capability and its GameAlert™ feature that tells listeners when their favorite teams are playing and when the score changes. The GameZone™ function displays favorite team scores on the control panel 6-line LCD screen. The SR-H1000 comes complete with rack mount ears for easy installation into equipment racks, RCA audio cables, Fiber Optic digital audio cable, remote control and antenna.

FEATURES

- **Two Zone Capable** with addition of the SC-H1 SIRIUSConnect™ Home Tuner.
- **All Of The Favorite SIRIUS Radio Features**, including GameAlert™, GameZone™, One-Touch Jump™ button, S-Seek™ and Replay™, which lets you pause, rewind and replay up to 44 minutes of live radio.
- **Composite (RCA Jack) Video** output permits the tuner to display Channel, Artist and Song Title on a TV or video monitor for easy viewing at a distance.
- **Optical Digital Output** for direct connection to audio components with digital inputs for lossless, pure performance.
- **Stereo Analog RCA-Type Jacks** allow the SR-H1000 tuner to connect to any stereo receiver or amplifier.
- **Built-In Audiophile-Grade Digital-To-Analog Converter Chip** ensures analog connections will have superior sound quality.
- **Analog Gain Stage** of the tuner is robust, providing more than enough output to deliver a full volume, low noise signal to any amplifier or receiver.
- **Full-Function Remote Control** duplicates the front panel controls plus adds numeric keys for direct channel access.
- **Control Features Include:** menu selection, channel preset jump, memory that stores up to 30 artist/song title for later retrieval, channel scan, display brightness control, 30 channel presets and more.
- **Parental Control And Channel Locks.**
- **5-12v Remote Trigger Power Input.**
- **Rear Panel RS-232 Jack** enables the tuner to integrate into the control functions of whole-house music distribution systems such as Crestron and NetStreams.
- Includes: tuner, remote control, AC power adapter, RCA audio cable, indoor/outdoor home antenna with 21' cable, and rackmount ears.
