

Outstanding Performance. Amazing Value.

Polk Audio has once again raised the standard for great sounding speakers that also offer incomparable value. The new TSi Series takes entry-level component speaker pricing and gives the audio/home theater buff a lot of Polk Audio for the money. The TSi Series was designed to be highly efficient, so they can be driven easily by unpretentious receivers, and they're voice-matched for lifelike surround sound environments. The new TSi Series' contemporary look was inspired by our top-of-the-line LSi Series and designed to work with today's most stylish televisions and electronic components.

TS/200

TS/400

FLOORSTANDING, BOOKSHELF AND CENTER CHANNEL FEATURES

- 1" (25mm) Silk/Polymer Composite Dynamic Balance Dome Tweeters with powerful Neodymium magnet structure delivers clear and detailed high frequency response for realistic reproduction of vocals and instruments.
- Dynamic Balance Composite Drivers are lightweight and stiff with good damping for high efficiency, excellent bass and lower distortion.
- Multiple small-diameter driver design delivers a more open, "box-less," three-dimensional sound.
- Center Channel speakers are magnetically shielded for safe placement near TVs with no risk of video distortion.
- Reversible-design Center Channel Speaker Cabinet can be turned upside down to aim "up" when placed under a video monitor.
- Critically Tuned Flared Ports minimize port noise ("chuffing") for good low frequency extension, resulting in natural, full-bodied sound with rich bass.
- Non-resonant all-MDF enclosure construction with 3/4" thick baffles ensures cleaner, clearer, more lifelike sound quality. Tower models feature additional front-to-back and side-to-side internal bracing.
- Computer modeled anti-diffraction grilles.
- Narrow baffle profiles create superior three-dimensional imaging and sound stage.
- High-gloss piano finish on tops, and high gloss piano finish on center channel end caps, complement the latest trends in flat screen TVs.
- Dual Five-Way Binding Post Connectors for more secure hook-up options, and bi-wiring and bi-amping flexibility.
- High efficiency design enables the TSi Series to reveal the classic Polk Audio sound (open, spacious and clear) even when driven by modestly-powered amplifiers and receivers.
- Available in two finishes. Black & Cherry.
- Available May 2008.
